

[The Cities of the Future Conference](#) will provide an opportunity to present and discuss leading-edge developments in the area of urban water services with an international audience of water utility personnel, researchers, engineers, technology providers, city planners, consultants, regulators and policy makers. It will be focused on the techniques, technologies and management approaches aiming at enabling and supporting the transition towards more sustainable urban water futures, but also zoom-in on the socio-economic requirements and aspects of this transition.

The conference includes discussion of climate resilience issues with regards to planning, engineering, governing and financing future urban water services.
